## **Ground Zero Makes Waves With New Wake Tower Speakers**

*High-performance, waterproof drivers paired with multicolor LEDs*

**DAVIE, FLA., April 24, 2019 (MEDIAWIRE)** – SounDigital USA, exclusive U.S. distributor of Ground Zero products, announced it is shipping a new series of marine speakers in time for summer fun on the water. The Ground Zero GZMS 65LED wake tower speakers come in element-proof white or black housings with mounting accessories to fit standard tower dimensions. They also feature a multi-color, remote-controlled LED system to liven up music with color. The new speakers expand the Ground Zero marine line and provide a premium, cost-efficient option for boating enthusiasts.

The GZMS 65LED speakers feature a 6.5-inch woofer with an Injection Molded Polypropylene (IMPP) cone and rubber surround. It is joined by a center-mounted 25mm Polyethyleneimine (PEI) tweeter. Power handling for the two-way driver is rated at 60 watts RMS and 120 watts max.

The sealed, IPX5-rated ABS enclosure of the GZMS 65LED stands up to rain and salt water, and the speaker is protected with a matching grille. Beneath the tweeter, a series of LEDs rotate between 12 color options based on commands from an included remote control.

“We’re excited to bring Ground Zero wake tower speakers to U.S. consumers,” said Diogo Ianaconi, CEO of SounDigital USA. “The marine and powersports market growth is creating a strong opportunity for specialist retailers to provide quality audio solutions for boats. Additionally, we are happy to deliver legendary Ground Zero sound to a growing market segment.”

The GZMS 65LED-B (black version) and GZMS 65LED-W (white version) both carry a MSRP of \$480.00 per pair.
