## **Orca Introduces Two Series of Focal Drop-In Speakers for Harley-Davidson**

*Four models deliver Focal sound in a seamless OEM look for 1998-2013 and 2014-up motorcycles*

**CAMARILLO, CALIF., December 11, 2019 (MEDIAWIRE)** – Orca Design and Manufacturing, developer and supplier of premium car audio speakers, amplifiers, processing and sound enhancement products in the U.S. market, announced it has introduced a new line of Harley-Davidson speaker sets from Focal. Four models consist of two renowned Focal speaker technologies that fit two different year spans of Harley-Davidson cycles: 1998-2013 and 2014 to present. The new kits enable owners to experience Focal imaging and clarity without altering the Harley-Davidson dash design.

The HDK165 series is anchored by Focal’s K2 cone, which is known for its combination of rigidity, lightness and damping. The composite sandwich cone design lends to increased power handling and reliability. The matching tweeter features an M-shaped converted Kevlar dome that enhances audio precision. Model numbers for the series are HDK165-98/2013 and HDK165-2014UP.

The Focal Inside HDA165 series is modeled after the brand’s popular Access speaker line. It utilizes Focal DFS® cone technology to deliver outstanding stability, power handling and resistance to the elements and changing temperatures. Paired with an aluminum inverted-dome compression tweeter, the HDA165 series provides superior dynamics and design at an accessible price point. Model numbers for the series are HDA165-98/2013 and HDA165-2014 UP.

Each of the models includes grilles and installation hardware that enable a direct fit and seamless factory look. MSRP for the HDA165 series is \$1,100, while the HDK165 series will retail for \$500. All models are expected to be available to retailers in January.

“This is our first offering of speakers made specifically for motorcycles,” said Nalaka Adikari, national sales manager for Orca. “These new kits are designed to drop into factory speaker locations and instantly improve the audio over factory systems. The iconic Harley-Davidson exhaust sound is said to be music to owners’ ears; now we’re adding even better music.”

### About Orca Design and Manufacturing

Based in Southern California, Orca acts as importer/distributor, designer and manufacturer for a variety of notable brands. We are the sole U.S. distributor for Focal mobile audio, and import speakers by Gladen Audio of Germany and Italian-made Mosconi amplifiers. In addition, we design quality products under the Illusion Audio brand, and offer Blackhole damping materials and Raven pure ribbon tweeters for home and mobile installations alike. For more information, visit our website at [orcadesign.com](http://orcadesign.com).
